TMPOS - CAFÉ THANKS IN THE HEART OF SEOUL, KOREA

Duluth, GA and Seoul, Korea - 07 Sep 2017 : TMPOS Inc. (OTC: TPPM)

proudly announces the grand opening of our first corporate owned and operated Café Thanks on August 23, 2017.

Café Thanks is strategically located in the heart of Kang-Nam Gu Seoul, one of the busiest and most heavily populated regions in Korea. Our model of franchise and corporate owned and operated chain stores targeting business sectors will result in corporate growth.

Café Thanks (<http://www.cafethanks.com>) is a unique approach to the traditional coffee shop in its incorporation of many characteristics of the conventional business solution model. Business trends are undergoing a global transformation known as the 4th Industrial Revolution which drives spending habits and consumption patterns through the implementation of Big Data.

TMPOS actively put forth efforts to implement innovated technology in conventional payment and point of sales solutions along with accepting specific digital currency in the POS system, and catering to rapidly evolving business needs.

TMPOS collaborated with many of our subsidiaries across six different countries around the globe to collect over 250,000 members' consumer data in the cloud data storage platform, powered by ThanksMatrix CRM. The members and information will be crucial to the growth of Café Thanks and its franchise and TMPOS' plans in future global expansion.

TMPOS strives to develop Café Thanks as an unprecedented ‘Smart Meeting Point’ on which its visitors can rely to provide the ultimate environment for both casual and formal business functions. In addition to providing the ‘Smart Meeting Point’ in Café Thanks, TMPOS successfully installed the company’s most advanced and innovated POS system with our own CRM solution software (Customer Relationship Management), designed and powered by ThanksMatrix and developed by one of our core subsidiaries, EsolutionTG.

TMPOS is excited to introduce our updated POS system which is designed to be well suited for any retail business model and provides traditional payment solutions, CRM (Customer Relationship Management), AIS (Account Information System) and WM (Workgroup Management) which are accessible anywhere, anyplace, and anytime because it uses cloud storage. Moreover, our POS system provides one of the most advanced digital currencies called ‘Trespass’ using TresWallet in the payment system at Café Thanks. TMPOS is further developing another form of digital payment called ‘ThanksCoin.’

TMPOS Inc. has put forth efforts to expand Café Thanks nationwide and globally, including Duluth, Georgia, Fort Lee, New Jersey, Los Angeles, California, Tenjin, China, and Thailand. TMPOS looks forward to exploring other venues in providing access to customers around the globe to Café Thanks, and its innovative approach in combining the traditional coffee shop model with innovative technology to create the ultimate experience for both casual and business usage.

TMPOS will continue to implement our model of prioritizing customers’ needs and innovative technology to other business industries, such as nails salons, skincare, and other retail businesses with ThanksMatrix CRM solution.
